**Diagnostic Inventory for Screening Children (DISC)
DISC Preschool Screen (DPS)**

Once a year, a developmental screening tool is completed with each child in the centre called the DISC Preschool Screen (DPS). It is a simple 15 – 20-minute developmental checklist based on 12 items, using specific toys on a 1:1 basis.

Based on the results of the DISC Preschool Screen, one of the following suggestions will be made:

- No further developmental screening is recommended (annual screening)
- A referral to a Resource Consultant is recommended for follow up with second stage screening with Diagnostic Inventory for Screening Children (DISC)
- Recommend alternate screening tool.

We are requesting your consent to have our staff complete the DISC Preschool Screen (DPS) with your child. The results will be shared with you. Do you consent?
